FOSS

Flow Cells now available with the FOSS XDS Rapid Liquid Analyzer

Flow cells can now be used with the XDS Rapid Liquid™ Analyzer from FOSS. The flow cells can be used for any liquid application and existing XDS Rapid Liquid Analyzers can be upgraded to handle these new cells.

The XDS Rapid Liquid Analyzer is designed to provide rapid quantitative and qualitative results for quality control and assurance. With the Rapid Liquid Analyzer, virtually any liquid or suspension can be analyzed in both laboratory and at-line situations. Samples are effortlessly analyzed in quartz cuvettes or disposable vials for trouble-free clean up. A temperature-controlled sample chamber provides the stable sample environment essential for precise measurements.

FOSS NIRSystems, Inc., a unit of FOSS A/S of Denmark, is the world's leading manufacturers of near infrared analytical instruments. Headquartered in Laurel, MD, FOSS NIRSystems provides a complete range of rapid scanning, near-infrared spectrophotometers for laboratory and process applications. Sales, service, and support offices are located on nearly every continent to assist local personnel in 65 industrial centers worldwide.
