### FOSS releases new features for Vision

FOSS NIRSystems, Inc. introduces Service Pack 3 for Vision 3.50. At the same time we are also releasing DSP 27, which replaces DSP version 26 and all previous versions.

Vision is a software package specifically designed for use with the FOSS NIRSystems Near-Infrared (NIR) laboratory and process analyzers. Vision 3.50 Service Pack 3 is a cumulative service pack and offers support for the latest NIR laboratory and process hardware.

Below are some of the new features added in Service Pack 3:

- A new option has been added for archiving Routine Analysis Output Projects
- The Instrument Stabilization test has been improved for better monitoring of the detector(s)
- A new XDS Setup/Diagnostics menu has been added to the menu bar

If you are a current user of the FOSS Vision software, please contact us for more information and/or a complete list of new features appearing in version 3.50, Service Pack 3.

The FOSS Vision software is 21 CFR Part 11 compliant and supports PAT through numerous process analysis options and process communication capabilities. The software has an extensive security system with multiple access levels, secure data archiving and report generation as well as database and spreadsheet compatibility. Vision comes with a user-friendly electronic manual with tutorials and data for self taught hands-on method development and software operation.

FOSS NIRSystems, Inc., a unit of FOSS A/S of Denmark, is the world's leading manufacturers of near infrared analytical instruments. Headquartered in Laurel, MD, FOSS NIRSystems provides a complete range of rapid scanning, near-infrared spectrophotometers for laboratory and process applications. Sales, service, and support offices are located on nearly every continent to assist local personnel in 65 industrial centers worldwide.
