FOSS

New capability enhancements for FOSS Vision software

FOSS NIRSystems, Inc. has released **Vision Cascading Libraries** version 2.00, which is fully validated and suitable for use with Vision Software version 3.50 SP1 (or higher) on computer systems in a validated environment. Cascading Libraries is a package that operates within the Vision Software and makes it possible for users of Vision to run samples against many libraries (models) at the same time. This will reduce the prediction time, provide flexibility in the process and simplify library validation.

FOSS NIRSystems has also released **Digital Protocols for Vision** version 1.8, which now supports Applicom IO 2.3.

The FOSS Vision software is 21 CFR Part 11 compliant and supports PAT through numerous process analysis options and process communication capabilities. The software has an extensive security system with multiple access levels, secure data archiving and report generation as well as database and spreadsheet compatibility. Vision comes with a user-friendly electronic manual with tutorials and data for self taught hands-on method development and software operation.

FOSS NIRSystems, Inc., a unit of FOSS A/S of Denmark, is the world's leading manufacturers of near infrared analytical instruments. Headquartered in Laurel, MD, FOSS NIRSystems provides a complete range of rapid scanning, near-infrared spectrophotometers for laboratory and process applications. Sales, service, and support offices are located on nearly every continent to assist local personnel in 65 industrial centers worldwide.
